

E-Kleen™ SR

Additive Smut Remover (SR) for Alkaline Cleaners and Acid Pickles

Alkaline Cleaner Additive

E-Kleen SR is an additive for EPI cleaners that is specifically formulated to remove carbonaceous (carbon smut) surfaces and difficult to clean metal working fluids. EPI has a complete line of **E-Kleen SR** soak cleaners and electrocleaners that have incorporated the **E-Kleen SR**.

E-Kleen SR works in soak, immersion, ultrasonic and electrocleaner tanks.

Concentration: 0.1% - 0.5% by volume of cleaning tank
Temperature: Run as per **E-Kleen** technical bulletin
Time: Run as per **E-Kleen** technical bulletin

E-Kleen SR is an excellent way to remove the carbon smut on carbon steel resulting in excellent adhesion plus brighter plated parts.

Acid Pickle Additive

E-Kleen SR is soluble in all mineral acids. In acidic pH's, it only takes 0.05% by volume (0.5 liters/1000 liters or 0.5 gallons/1000 gallons) of **E-Kleen SR**. It is also compatible with E-Pik Inhibitor or E-HIB 979. It prevents the smut that can form in mineral acids and offers extra acid based cleaning, resulting in stain free and brighter parts.

Packaging

1 gallon, 5 gallon and 55 gallon, (net) in plastic, non-returnable containers. Keep lid on when not in use.

IMPORTANT NOTICE! For Industrial Use Only

The following is made in lieu of all warranties, expressed or implied, including the implied warranties of merchantability and fitness for purpose: seller's and manufacturer's only obligation shall be to replace such quantity of the product as proved to be defective. Before using, user shall determine the suitability of the product for its intended use, and user assumes all risk and liability whatsoever in connection therewith. **Neither seller nor manufacturer shall be liable either in tort or in contract for any loss or damage, direct, incidental or consequential, arising out of the use of the inability to use the product.**
